

About Danielle: Danielle LaRock is a 2011 Presidential Management Fellow on a development assignment with the California Landscape Conservation Cooperative. Normally, Danielle serves on the Applied Landscape Conservation team at the National Conservation Training Center with the U.S. Fish and Wildlife Service. She leads courses on structured decision making, climate change, and works to integrate emerging priorities within the USFWS into courses across NCTC curricula. Danielle completed her M.S. in environmental science at Louisiana State University, investigating the effects of Hurricane Katrina on quality of life and environment in New Orleans, LA. Danielle has been an environmental activist since personally witnessing the devastating social and environmental impacts of Hurricane Katrina. She is passionate about developing strategies for effective natural resource management, especially with regard to climate change.
