

SESSION 4: EXERCISE (LINKING VULNERABILITY, OBJECTIVES, THEMATIC STRATEGIES & MANAGEMENT TOOLS)

Feature/Attribute: Sub-grp:

Note-taker name:

1. What are critical vulnerabilities or components of (exposure, sensitivity, adaptive capacity)?	2. What are <u>current</u> objectives for the resource in the S. Sierra?	3. What <u>should</u> "retrofitted objectives" be for the resource in the S. Sierra?	4. What are possible thematic strategies and management tools to meet our objectives for the future?			
			Manage for Persistence		Manage for Change	
			Resist change	Build resilience	Facilitate transformation	Anticipate and plan reaction to extreme events

5. What are constraints & trade-offs to implementation (including other objectives that present conflicts)?

Potential Management Tools	Constraints
----------------------------	-------------

6. What thematic strategies and management tools are most likely to enable us to meet objectives? Who has the capacity to use different management tools? Where will the tools be most successful? What factors will enable us to meet objectives in certain places?

7. BONUS QUESTIONS: A) What would success look like? What are the indicators of success? B) How can we work together to overcome constraints? C) What gaps in monitoring and research are most important to fill? How do we work together to fill these gaps?
